PROFESSIONAL SUMMARY

Experienced Software Engineer with 2+ years of hands-on programming experience and comprehensive expertise in full-stack development. Proficient in Java, C/C++, Python, and modern web technologies. Strong foundation in data structures, algorithms, and database management with proven project delivery experience.

EDUCATION

East West University Dhaka, Bangladesh
BSc in Computer Science & Engineering (CSE) Oct 2021 – Sept 2025
Major: Software Engineering | **Coursework:** System Design & Software Engineering, Quality Assurance and Testing, Web Programming, Mobile Application Development, Advance Database Management PL/SQL, Artificial Intelligence

PROJECTS

FoodBridge Bangladesh

GitHub Code

- Developed full-stack food distribution platform connecting donors with recipients to reduce food waste in Bangladesh
- Implemented 50+ RESTful APIs with Spring Boot, PostgreSQL database, and JWT ,WebSocket for real-time notifications, SMTP emails, authentication with role-based access control
- Built React.js frontend with role-based dashboards for donors, receivers, merchants, and administrators

Sustainable Farming Management System (SFMS)

GitHub

- Built comprehensive agricultural management platform to optimize farming practices and enhance crop productivity
- Developed features for crop management, soil health monitoring, irrigation scheduling, and weather alert system
- Integrated GPT Model through Huggingface for intelligent pest control recommendations and crop yield predictions
- Implemented expert consultation system allowing farmers to receive personalized agricultural advice via email
- Designed complex MySQL database supporting plant records, soil data, irrigation schedules, and user management
- Created RESTful APIs with input validation and CRUD operations for all farming management workflows

Green Computing Platform

GitHub

- Developed educational platform promoting environmental sustainability through interactive data visualizations
- Implemented data visualization dashboards displaying environmental metrics and sustainability statistics
- Built responsive user interface with React.js supporting cross-device compatibility
- Designed RESTful backend APIs for data management and real-time content delivery
- NetGurd:** A web-based House Net Controlling system by React.js and Java (Frontend Completed) – GitHub

WORK EXPERIENCE

Full Stack Developer August 2025 – September 2025
Doel e-Service Dhaka, Bangladesh

TECHNICAL SKILLS

Languages: Java (OOP), C/C++, Python, JavaScript (ES6+), PHP, HTML5, CSS3
Frameworks: Spring (Boot, Security, Data JPA, OAuth2, JWT, WebFlux, Cloud, Batch, Mail, WebSocket, AI), React.js, Thymeleaf
Database & Tools: MySQL, PostgreSQL, Git, Docker, Maven, Postman, JMeter, Selenium
Software Engineering: RESTful API Design, Microservices, Design Patterns, Agile, Unit & Integration Testing

RESEARCH

Harnessing Machine Learning to Forecast Cardiovascular Disease using Explainable AI
Conference: 2025 International Conference on Quantum Photonics, Artificial Intelligence, and Networking (QPAIN)
IEEE: Click Here

Machine Learning for Optimizing Renewable Energy and Solar Grid Efficiency
Journal: Springer Nature Click Here

Sustainable Farming Management System: A Web-Based Agricultural Knowledge Platform
Accepted: December 2025
Conference: 11th IEEE WICON-ECE 2025 Click Here

ACHIEVEMENTS & CERTIFICATIONS

HackerRank Certifications:

- Problem Solving (Intermediate) – View Certificate
- Frontend Developer (React) – View Certificate
- Software Engineer – View Certificate
- SQL (Intermediate) – View Certificate
- REST API (Intermediate) – View Certificate

Professional Competencies:

- Data Structures & Algorithms, System Design & Architecture, Database Design & Optimization, API Development & Integration, Problem-Solving & Debugging

Languages:

- English (Professional Working Proficiency), Bangla (Native Speaker)
