

AL-IMAM UDDIN

Dhaka, Bangladesh | alimamuddin755@gmail.com | +88 01864719755
linkedin.com/in/al-imam-uddin | https://github.com/alimamuddin

PROFESSIONAL SUMMARY

Experienced Software Engineer with 2+ years of hands-on programming experience and comprehensive expertise in full-stack development. Proficient in Java, C/C++, Python, and modern web technologies. Strong foundation in data structures, algorithms, and database management with proven project delivery experience.

EDUCATION

East West University Dhaka, Bangladesh
BSc in Computer Science & Engineering Oct 2021 – Sept 2025
Major: Software Engineering | Coursework: System Design & Software Engineering, Quality Assurance and Testing, Web Programming, Advance database management PLSQL, Artificial intelligence(AI)

PROJECTS

- FoodBridge Bangladesh** 2025
Technologies: Spring Boot, PostgreSQL, React.js, Spring Security, JWT
🔗 Live Demo 🔗 GitHub
• Developed full-stack food distribution platform connecting donors with recipients to reduce food waste in Bangladesh
• Implemented 50+ RESTful APIs with Spring Boot, PostgreSQL database, and JWT authentication with role-based access control
• Built React.js frontend with role-based dashboards for donors, receivers, merchants, and administrators
• Integrated WebSocket for real-time notifications, SMTP emails, and mobile banking payment system (bKash, Nagad, Rocket)
- Sustainable Farming Management System (SFMS)** 2023
Technologies: Spring Boot, MySQL, Thymeleaf, Spring AI
🔗 GitHub
• Built comprehensive agricultural management platform to optimize farming practices and enhance crop productivity
• Developed features for crop management, soil health monitoring, irrigation scheduling, and weather alert system
• Integrated Spring AI framework for intelligent pest control recommendations and crop yield predictions
• Implemented expert consultation system allowing farmers to receive personalized agricultural advice via email
• Designed complex MySQL database supporting plant records, soil data, irrigation schedules, and user management
• Created RESTful APIs with input validation and CRUD operations for all farming management workflows
- Green Computing Platform** 2024
Technologies: Spring Boot, React.js, Data Visualization Libraries
🔗 Live Demo 🔗 GitHub
• Developed educational platform promoting environmental sustainability through interactive data visualizations
• Implemented data visualization dashboards displaying environmental metrics and sustainability statistics
• Built responsive user interface with React.js supporting cross-device compatibility
• Designed RESTful backend APIs for data management and real-time content delivery
- Additional Projects**
• **E-Commerce Platform (Doyel):** Full-stack marketplace with product management from admin user both product listing to customer visit – 🔗 GitHub
• **NetGurd:** A web-based House Net Controlling system by React.js and Java (Frontend Completed) – 🔗 GitHub
• **Unirent Management System:** PHP-based rental management system with booking workflows

TECHNICAL SKILLS

Languages: Java (OOP), C/C++, Python, JavaScript (ES6+), PHP, HTML5, CSS3
Frameworks: Spring (Boot, Security, Data JPA, OAuth2, JWT, WebFlux, Cloud, Batch, Mail, WebSocket), React.js, Thymeleaf
Database & Tools: MySQL, PostgreSQL, Git, Docker, Maven, Postman, JMeter, Selenium
Software Engineering: RESTful API Design, Microservices, Design Patterns, Agile, Unit & Integration Testing

ACHIEVEMENTS & CERTIFICATIONS

- HackerRank Certifications:**
• Problem Solving (Intermediate) – ID: C5E4AE08479F
• Frontend Developer (React) – ID: 64EA7F2AD4D4
• Software Engineer – ID: AF3905670ABC
• SQL (Intermediate) – ID: F2AEB564B512
• REST API (Intermediate) – ID: 050407FFDBEA
- Professional Competencies:** Data Structures & Algorithms, System Design & Architecture, Database Design & Optimization, API Development & Integration, Problem-Solving & Debugging
Languages: English (Professional Working Proficiency), Bangla (Native Speaker)
